

ALPHA Handwriting

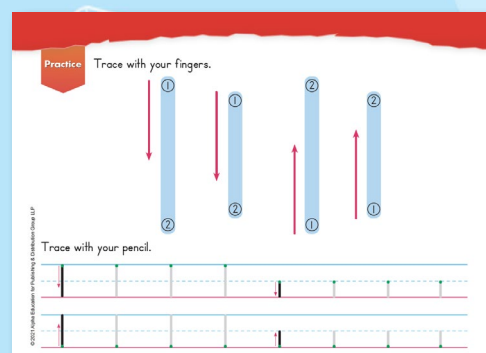

Alpha Handwriting is a three-level course that provides a progression of skills for students to master handwriting. Delightfully illustrated, these fun handwriting books focus on letter, word, number and basic punctuation formation.

Each level is broken down into easy-to-follow sections, with common everyday words, sentences, and prompts appropriate for early grades.

Each level includes

- Getting ready to write: posture, fine motor skills, and mechanics practice
- Both right- and left-handed writing positions
- Information for different line formations and practice in creating those lines and applying them to create letters and numerals
- Groups of letters arranged by similar formations and strokes. For example, students practice vertical lines with the letters Ll, li, Tt, Ff.
- Activities that allow students to work progressively through letter, word, and sentence formation

- Information on the importance of correct letter size and spacing to making writing legible and practice in evaluating and applying knowledge of letter size and spacing
- Many opportunities for students to create uppercase and lowercase letters and punctuation marks
- An informal summative assessment—Write What You Know
- Practice that connects to Math and ELA standards
- A Handwriting Hero mascot who encourages students to write.
